DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The rowhouse is two bays wide and three stories high. In either bay fenestration is symmetrical. Building and foundation walls are laid in common bond and the roof is flat. To the left the foundation wall is punctuated by two flat double light casement windows, each with a brick sill and stone lintel. The first, second, and third story facades of the left bay are punctuated by a bay window. Each of the three windows is of a identical design: three symmetrically organized flat shallow bay windows double hung with one over one lights and sharing common painted wood mullions and woodwork. Each window is set between a stone sill and stone lintel. The wall between the shallow bay window and the entrance is punctuated by a flat window double hung with one over one lights and set between a stone sill and stone lintel. The entrance is comprised of a flat double door, each with one light, made of wood and resting on a stone stoop and two stone steps. The double door is surmounted by a flat single light transom. Either story facade above the door is comprised of an oriel. Each story facade of the oriel is punctuated by three flat double hung windows with one over one lights. Above and below both sets of windows are inset panels, the two upper sets with applied decoration. The building facade is surmounted by a painted wood cornice with dentals.

SPECIFIC DATES

c. 1890

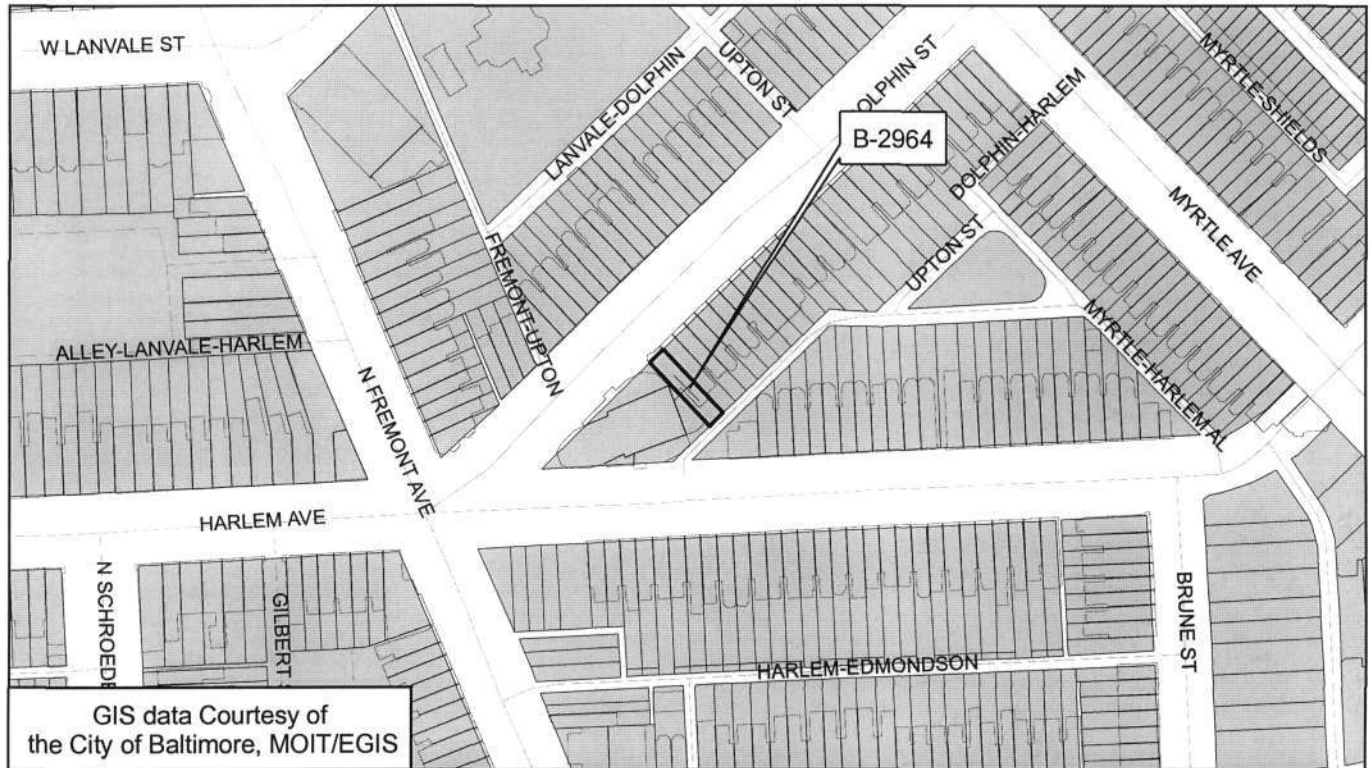

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This building is atypical in the Upton area because of its large 2-story oriel window and three bay windows. The building was constructed at a later date than most of the buildings in this portion of the community.
